To whom it may concern:

When I first heard of XM radio and what it offered I immediately signed up for service and purchased a receiver. Since that time I have added another four XM radios and can't be more excited about such a great product. I was SICK AND TIRED of listening to AM and FM radio broadcasts with the poor quality, excessive commercials and limited content that they offered. XM radio is truly REVOLUTIONARY and long overdue! As a subscriber paying for this service, I can't believe that the NAB has anything to say regarding the content offered on XM. They have NO RIGHT to interfere with the service that XM provides and I am STRONGLY OPPOSED to the NAB petition 04-160! LEAVE XM ALONE! It's a GREAT PRODUCT and XM should have the right to provide any type of programming including traffic and weather. I respectfully urge the FCC to REJECT the NAB petition #04-160.

Sincerely,
Ronald Vesely
